Efficacy of 1% Pyrethrins and 5% Piperonyl Butoxide Space Spray

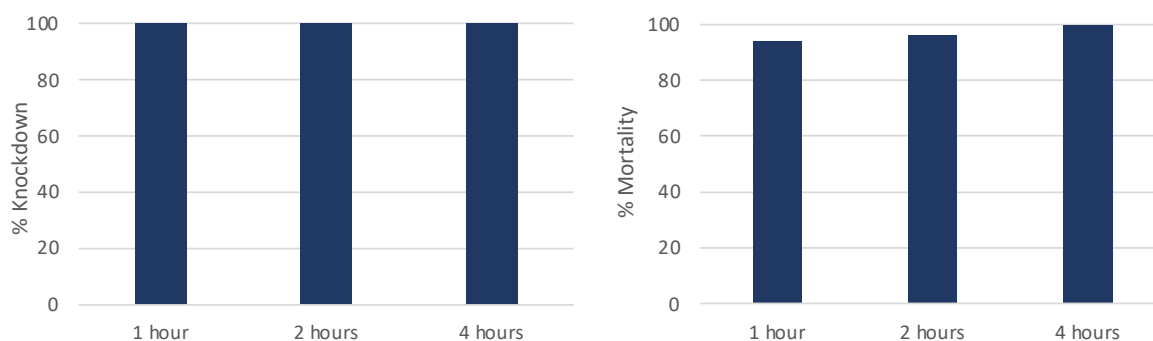

Source: Bio Research, Fresno CA. 2007.

What does this data mean to your business?

Pyrethrins with PBO are effective against a wide range of insects commonly found in and around livestock environments and in one hour, it achieves high knockdown of insects such as stable flies and German cockroaches.

Efficacy of 1% Pyrethrins and 5% Piperonyl Butoxide Space Spray on House Flies (*Musca domestica*)

Source: Snell Scientific, 2006.

What does this data mean to your business?

House flies are one of the most common insects in livestock and poultry environments, impacting animal health and productivity. Pyrethrins with PBO knocks down flies, helping you protect animal health and production.

Always read and follow all label instructions.
